Summary

Frontend developer focused on building clean, fast, and user-friendly web apps using React, Next.js, and Tailwind CSS. Projects include content platforms, e-commerce dashboards, and institutional websites—most notably the 57357 Hospital site and CMS.

Experience

57357 Children's Cancer Hospital Foundation

Dec 2024 - Present

Frontend Developer

Egypt, On-site

- Developed the main hospital website from scratch using **Next.js**, serving as a key digital touchpoint for one of the largest pediatric cancer hospitals in the Middle East.
- Built a full-featured content management dashboard to enable internal teams to manage and publish content efficiently.
- Executed complete **SEO optimization** (dynamic & static meta tags, automated sitemap, robots.txt, link strategy), achieving **100% SEO audit score**.
- Worked on **Pharmacy QMS** system improvements by fixing bugs, enhancing UI/UX, and implementing new features based on clinical team feedback.

LMFoundry

Feb 2025 – Present

Frontend Developer

Part-time, Remote

- Built AI-powered dashboard in **React/TypeScript** with smooth UX and reusable components.
- Developed **real-time streaming chat** via SSE, dynamic model switching, and file/image uploads with **Zod/Yup** validation.
- Refactored API handling for Azure OpenAI configs, reducing request errors and improving backend reliability.

Tawadeet Social-media Platform — App

Jul 2024 - Dec 2024

Frontend Developer

Contract, Remote

- Built a cross-platform storytelling app for web and mobile.
- Enhanced state management and data fetching using Zustand and React Query for a seamless user experience.
- Created a scalable and reusable UI library using NativeWind and Glue Stack UI to accelerate development and maintain design consistency.
- Set up coherent navigation structures using Expo Router (mobile) and Next.js App Router (web).

Quran Tab

Nov 2023 - Dec 2024

Frontend Developer

Egypt, Remote

- Resolved over 10 reported Arabic prayer time and Hijri date issues, improving accuracy and user satisfaction.
- Technical Documentation: Created comprehensive developer documentation to facilitate future development.

Independent Frontend Developer

Feb 2023 – Dec 2024

Egypt, Remote

- Delivered multiple production-grade freelance projects across different industries including fintech, accounting, video portfolios, and branding.
- Worked with modern frontend stacks (Next.js, Tailwind CSS, Zustand, React Query) and integrated CMS, localization, and API-driven backends.
- Key projects include: LitePay (virtual card platform), Jazr.io (restaurant accounting), Brand Leveling, and Aliyn (see Projects section).
- Also contributed to localized platforms and portfolio sites: Social Magic Agency, FAWZY Portfolio, Microshabab, and Smartgamesapp — with a focus on UI enhancement, media optimization, and performance tuning.

Technical Skills

- Languages:** JavaScript, TypeScript, HTML5, CSS3
- Frontend Frameworks & Libraries:** React.js, Next.js, React Query, Zustand, Redux Toolkit, Framer Motion, Bootstrap, Tailwind CSS, Ant Design
- Backend & APIs (Familiar):** Basic experience with Node.js, Express.js, REST APIs, Next.js API Routes, MongoDB (Mongoose)
- Dev Tools & Concepts:** Git & GitHub, Agile Methodology
- Deployment & Hosting:** Vercel, Netlify, Render

Projects

- LitePay | *Next.js, Tailwind CSS*

- Developed a virtual card management platform with a secure, clean UI using component-based design.

 [Live](#)
- Aliyn (Aliyn Software House) | *JavaScript, Tailwind CSS*

- Developed a responsive portfolio site for a software house, implementing clean UI and optimized performance across devices.

 [Live](#)
- T-Shop Platform | *React, Redux, Tailwind CSS, Node.js, Express, MongoDB*

- E-commerce platform for electronic devices.
 - User features: Wishlist, cart management, payment integration (Stripe), reviews.
 - Admin dashboard: Order, product, brand, category, and coupon management.

 [Code](#)  [Live](#)
- Nifty Nafty | *React, Framer-motion, CSS*

- Crafted a visually engaging website with interactive elements and smooth transitions, enhancing the user experience through dynamic scrolling effects.
