Summary

Frontend Developer specializing in **React.js and Next.js**, delivering production-grade web applications across healthcare, fintech, and AI platforms. Led 57357 Hospital's international expansion (USA/Canada+) on a single codebase, saving 80% dev time; built production dashboards with React Query/Zustand. Focused on performance, cross-browser compatibility, and SEO (100% audits).

Experience

57357 Children's Cancer Hospital Foundation Dec 2024 - Present
Frontend Developer *Egypt, On-site*

- **Led multi-tenant architecture** for international expansion: proposed and implemented a single Next.js codebase supporting 5+ countries (USA, Canada, Switzerland+), saving **80%+ development time** vs. separate sites. Integrated **Blackbaud** payments for USA/Canada + dynamic local gateways.
- Developed the main hospital website from scratch using **Next.js with clean, semantic markup**, verified across browsers and devices — serving as a key digital touchpoint for one of the largest pediatric cancer hospitals in the Middle East.
- Built a full-featured content management dashboard with a **reusable component library / design system**, enabling internal teams to manage and publish content efficiently.
- Executed complete **SEO optimization** (dynamic & static meta tags, automated sitemap, robots.txt, link strategy), achieving a **100% SEO audit score**.
- Contributed to **code reviews** and worked on Pharmacy QMS improvements by fixing bugs, enhancing UI/UX, and implementing new features based on clinical team feedback.

LMFoundry Feb 2025 – Oct 2025
Frontend Developer *Part-time, Remote*

- Built an AI-powered dashboard in **React/TypeScript** with smooth UX and reusable components.
- Developed **real-time streaming chat** via SSE, dynamic model switching, and file/image uploads with Zod/Yup validation.
- Refactored API handling for Azure OpenAI configs, reducing request errors and improving backend reliability.

Hawadeet Social-media Platform — App Jul 2024 - Dec 2024
Frontend Developer *Contract, Remote*

- Built a cross-platform storytelling app for web and mobile.
- Enhanced state management and data fetching using Zustand and React Query for a seamless user experience.
- Created a scalable, reusable UI library / **design system** using NativeWind and Glue Stack UI to accelerate development and maintain design consistency.
- Set up coherent navigation structures using Expo Router (mobile) and Next.js App Router (web).

Quran Tab Nov 2023 - Dec 2024
Frontend Developer *Egypt, Remote*

- Resolved over 10 reported Arabic prayer time and Hijri date issues, improving accuracy and user satisfaction.
- Created comprehensive technical documentation to facilitate future development.

Independent Frontend Developer Feb 2023 – Dec 2024
Freelance *Egypt, Remote*

- Delivered multiple production-grade freelance projects across different industries including fintech, accounting, video portfolios, and branding.
- Worked with modern frontend stacks (Next.js, Tailwind CSS, Zustand, React Query) and integrated CMS, localization, and API-driven backends, with a focus on responsive, cross-browser layouts.

- Key projects include: LitePay (virtual card platform), Jazr.io (restaurant accounting), Brand Leveling, and Aliyn (see Projects section).
- Also contributed to localized platforms and portfolio sites: Social Magic Agency, FAWZY Portfolio, Microshabab, and Smartgamesapp — with a focus on UI enhancement, media optimization, and performance tuning.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend Frameworks & Libraries: React.js, Next.js, React Query, Zustand, Redux Toolkit, Framer Motion, Bootstrap, Tailwind CSS, Ant Design

Core Practices: Semantic HTML, responsive & cross-browser design, reusable component design / design systems, unit & component testing, performance optimization, SEO, code reviews

Backend & APIs (Familiar): Node.js, Express.js, REST APIs, Next.js API Routes, MongoDB (Mongoose)

Dev Tools & Concepts: Git & GitHub, CI/CD, Docker, Linux (basics), Jest, React Testing Library, Agile methodology, manual cross-browser testing

Deployment & Hosting: Vercel, Netlify, Render

Projects

LitePay | Next.js, Tailwind CSS Live

- Developed a virtual card management platform with a secure, clean UI using component-based design.

Aliyn (Aliyn Software House) | JavaScript, Tailwind CSS Live

- Developed a responsive portfolio site for a software house, implementing clean UI and optimized performance across devices and browsers.

T-Shop Platform | React, Redux, Tailwind CSS, Node.js, Express, MongoDB Code | Live

- E-commerce platform for electronic devices with wishlist, cart, Stripe payments, and reviews.
- Admin dashboard for order, product, brand, category, and coupon management.

Nifty Nafty | React, Framer Motion, CSS Code | Live

- Crafted a visually engaging website with interactive elements, smooth transitions, and dynamic scrolling effects.

Education

Cairo University Sep 2023 - Jul 2025

Postgraduate Diploma in Computer Science

- Relevant coursework: Data Structures & Algorithms (C++), Databases, Networks.

Minia University Sep 2019 - Jul 2023

Bachelor of Arts

Languages

English: Good Arabic: Native
